What is AUDISEQ?

The comprehensive audit solution of the AUDISECURE group

Holistic Analysis

AUDISEQ analyzes all auditable parameters within the Information Security compliance frameworks, from the Statements of Applicability. Generating audit analysis reports and RISK analysis reports, based on a standard methodology.

Strategic Tool

AUDISEQ is entirely an audit tool from the compliance approach of organizations, saving time and costs in audit resources.

Compliance Oriented

Unlike other cloud tools that analyze operations in real time, AUDISEQ offers a completely compliance-oriented approach, specifically designed for audits.

Differential Value

While other tools are incomplete for audits, AUDISEQ provides an exhaustive analysis specifically designed to meet regulatory requirements.

Complete

Efficient

Strategic

Functionalities and Compliance Frameworks

Advanced technology for the comprehensive management of audits

Main Functionalities
